Collin Boler

collinboler@princeton.edu | (973)-533-8028 | collinboler.com | github.com/collinboler

Education

Princeton University Princeton, NJ

Bachelors in Computer Science, Minor in Statistics and Machine Learning *Expected May 2027*

Experience

Oracle Redwood City, CA

Cloud Engineer Intern *June - September 2026*

- Engineered a scheduled workflow to detect and diagnose performance drift in production machine learning models, decreasing median time to resolution by over 50%.
- Developed an agent that optimizes Spark compute clusters in Oracle AI Data Platform workspaces, improving compute cost efficiency by 30% across benchmark workloads.
- Built an internal tool for Oracle Fusion AI Agent Studio that automatically executes scheduled agent evaluations, saving over 10 engineering hours per month.

Credit Benchmark New York, NY

Data Science Intern *June – August 2025*

- Architected a data pipeline to back-test 10 years of credit data from 40+ global banks (110,000+ entities) and authored the resulting industry white paper, synthesizing technical findings for non-technical stakeholders.
- Engineered and optimized a supervised machine learning model to forecast North American corporate credit trends. The model enables the firm to identify future sector-level credit deterioration or improvement.

1440.io Park City, UT

Software Engineer Intern *June – August 2024*

- Developed a customer outreach module that eliminates language barriers by integrating transcription, translation, speech synthesis, and response recommendations, which boosted client productivity by over 50%.
- Contributed to the design, development, and maintenance of custom Salesforce applications for enterprise clients (Lowe's, Formula 1, LEGO) leveraging Jira for task management.

Selected Personal Projects

Computer Vision Geo-Location Extension

- Built a Chrome extension that leverages computer vision to predict the geographic location of on-screen imagery.
- Scaled to 45,000+ installs, 12,000+ weekly active users, and $27,000+ annual recurring revenue.

CRXray: Chrome Extension Source Explorer

- Developed an NPM package for downloading the source code of Chrome Web Store extensions, 3,000+ installs.

School Activities

TigerApps *Software Engineer*

- Developing The Forum, Princeton's student event directory, and Princeton Intelligence, an AI agent for students.

Princeton Varsity Track and Cross Country *Student Athlete*

- 3:38 1500 (3:55 mile), U.S. Championships qualifier, Division I All-American, Ivy League champion, Princeton 600m record holder.

Awards

Most Innovative - Oracle Intern Hackathon

- Built an automated evaluation workflow that stress-tests AI agents across custom edge cases.

3rd Place - Sentient AGI Real Revenue Hackathon

- Developed an AI advertising platform using Sentient's inference model to generate marketing content for businesses.

Technical Skills

Languages: Java, Python, SQL, C, Go, x86 Assembly, HTML/CSS, JavaScript, TypeScript
Frameworks: Express.js, FastAPI, Flask, Salesforce Lightning Web Components, Next.js, Vite
Libraries: PyTorch, scikit-learn, Pandas, NumPy, Matplotlib, Selenium
Tools: Git, Docker, AWS (S3, EC2, ECR), Oracle OCI, Firebase, Postman, Salesforce DX
