

# Collin Boler

collinboler@princeton.edu | (973)-533-8028 | collinboler.com | github.com/collinboler

## EDUCATION

### Princeton University

*Bachelors in Computer Science, Minor in Statistics and Machine Learning*

Princeton, NJ

*Expected May 2027*

## EXPERIENCE

### Oracle

*Cloud Engineer Intern*

Redwood City, CA

*June - September 2026*

- Engineered a scheduled workflow to detect and diagnose performance drift in production machine learning models, decreasing median time to resolution by over 50%.
- Developed an agent that optimizes Spark compute clusters in Oracle AI Data Platform workspaces, improving compute cost efficiency by 30% across benchmark workloads.
- Built an internal tool for Oracle Fusion AI Agent Studio that automatically executes scheduled agent evaluations, saving over 10 engineering hours per month.

### Credit Benchmark

*Data Science Intern*

New York, NY

*June - August 2025*

- Architected a data pipeline to back-test 10 years of credit data from 40+ global banks (110,000+ entities) and authored the resulting industry white paper, synthesizing technical findings for non-technical stakeholders.
- Engineered and optimized a supervised machine learning model to forecast North American corporate credit trends. The model enables the firm to identify future sector-level credit deterioration or improvement.

### 1440.io

*Software Engineer Intern*

Park City, UT

*June - August 2024*

- Developed a customer outreach module that eliminates language barriers by integrating transcription, translation, speech synthesis, and response recommendations, which boosted client productivity by over 50%.
- Contributed to the design, development, and maintenance of custom Salesforce applications for enterprise clients (Lowe's, Formula 1, LEGO) leveraging Jira for task management.

## SELECTED PERSONAL PROJECTS

### Computer Vision for Geo-Location Chrome Extension

- Built a Chrome extension that leverages computer vision to predict the geographic location of on-screen imagery.
- Scaled to 40,000+ installs, 11,000+ weekly active users, and \$24,000+ annual recurring revenue.

### CRXray: Chrome Extension Source Explorer

- Developed an NPM package for downloading the source code of any Chrome Web Store extension, reaching 3,000+ downloads.

## SCHOOL ACTIVITIES

### Princeton Varsity Track and Cross Country

*Student Athlete*

Princeton, NJ

*Fall 2023 - Present*

- 3:38 1500 (3:55 Mile conversion), Qualified for United States Track and Field Championships, Division I All-American, Ivy League champion, Princeton University record holder in 600m.

## AWARDS

### Most Innovative - Oracle Intern Hackathon

- Built an automated evaluation workflow that stress-tests AI agents across custom edge cases.

### 3rd Place - Sentient AGI Real Revenue Hackathon

- Developed an AI advertising platform using Sentient's inference model to generate marketing content for businesses.

## TECHNICAL SKILLS

---

**Languages:** Java, Python, SQL, C, Go, x86 Assembly, HTML/CSS, JavaScript, TypeScript

**Frameworks:** Express.js, FastAPI, Flask, Salesforce Lightning Web Components, Next.js, Vite

**Libraries:** PyTorch, scikit-learn, Pandas, NumPy, Matplotlib, Selenium

**Tools:** Git, Docker, AWS (S3, EC2, ECR), Oracle OCI, Firebase, Postman, Salesforce DX
